## Education

---

|                                                        |                   |
|--------------------------------------------------------|-------------------|
| <b>Vellore Institute of Technology, Vellore</b>        | 2023 – 2027       |
| Bachelor of Technology in Computer Science Engineering | <b>CGPA: 8.96</b> |
| <b>DAV Public School, Sreshtha Vihar, Delhi</b>        | 2023              |
| Senior Secondary (Class XII)                           | <b>94%</b>        |
| <b>DAV Public School, Sreshtha Vihar, Delhi</b>        | 2021              |
| Secondary (Class X)                                    | <b>88%</b>        |

## Skills

---

**Programming:** Python, Java, C, C++  
**Web Development:** HTML, CSS, JavaScript, TypeScript, React, Node.js, Flask, Django, Express  
**Databases & Backend:** MySQL, MongoDB, REST APIs, JWT  
**Tools:** Git/GitHub, Linux, Docker, Kubernetes, Vertex AI, Google Colab, Power BI, Tableau, Excel  
**Libraries:** NumPy, Pandas, Matplotlib, TensorFlow, Keras  
**CS Fundamentals:** OOP, DBMS, SQL, DSA, OS, CN, COA, System Design  
**Soft Skills:** Ownership mindset, Problem Solving, Time Management, Adaptability

## Projects

---

|                                                                                                                                            |               |
|--------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>GoRide</b> (React, Flask, MySQL)                                                                                                        | <i>GitHub</i> |
| Web-based ride booking platform enabling users to book rides, manage profiles, and view trip details through a clean, intuitive interface. |               |
| <b>SecureFinanceApp</b> (Node.js, MongoDB, JWT, Bcrypt)                                                                                    | <i>GitHub</i> |
| Built a secure server-side application for real-time digital transactions with JWT authentication, bcrypt hashing, and RESTful APIs.       |               |
| <b>ThreatDetection System</b> (Python, Scikit-learn, TensorFlow)                                                                           | <i>GitHub</i> |
| Developed an ML-based system to detect network anomalies using traffic analysis, REST APIs, and visualization dashboards.                  |               |
| <b>Patient Report Analysis</b> (Python, LangChain, Ollama, Streamlit)                                                                      | <i>GitHub</i> |
| AI-powered application analyzing medical JSON/FHIR data using multi-agent LLM pipelines for health insights and risk prediction.           |               |
| <b>Command Line Interface Tool</b> (Node.js, Hugging Face API, GitHub API)                                                                 | <i>GitHub</i> |
| Developed a modular CLI for GitHub automation, file management, and AI model interaction to streamline developer workflows.                |               |

## Certifications

---

|                                                              |                    |
|--------------------------------------------------------------|--------------------|
| • IBM Full Stack Software Developer Professional Certificate | <i>Certificate</i> |
| • Programming with Java – Amazon                             | <i>Certificate</i> |
| • Machine Learning – DeepLearning.AI(Stanford)               | <i>Certificate</i> |
| • OCI Generative AI Professional Certificate – Oracle        | <i>Certificate</i> |
| • Google Cybersecurity Professional Certificate – Ongoing    |                    |

## Extracurriculars

---

|                                                                                                                                                    |                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>IEEE Engineering in Medicine and Biology Society (EMBS), VIT</b>                                                                                | <b>May 2024 – Dec 2024</b> |
| • Actively contributed to organizing technical events and workshops focused on biomedical engineering, biotechnology, and healthcare technologies. |                            |
| • Collaborated with peers to plan sessions bridging engineering concepts with medical and biological applications.                                 |                            |
| • Participated in knowledge-sharing initiatives covering emerging trends in biotech, medical devices, and interdisciplinary research.              |                            |
